PROFILE

A hard-working fast learner, driven by a desire to improve and learn, who enjoys learning new technologies, and adapting approaches to projects.
Enjoy taking part in hackathons, which are used as opportunities to learn new techniques and technologies.
Up-to-date portfolio can be viewed at https://btharding.github.io/ or on GitHub.

EDUCATION

University of Birmingham, UK **09/2019 to present**
BSc Computer Science

- Year 1 modules included Java Development, Data Structures and Algorithms, Fundamentals of Artificial Intelligence, Maths for Computer Science, and Logic. Achieved an 80% grade average in my first year.
- Year 2 (current year) modules include Software Engineering and Professional Practice, Functional Programming, Systems Programming in C, Artificial Intelligence and Security and Networks.

Marling School, Gloucestershire **Sept 2012 to May 2019**
A-Levels: Achieved AAAB in Computer Science, Maths, Physics, and Chemistry, respectively.
GCSE's: Achieved 13 GCSE's including Level 8 in Maths, Level 7 in English, and A* in Computer Science .

EXPERIENCE

Wilxite **07/2018 to 07/2018**
Work Experience

Wilxite are a high-performance web development company based in Stroud, Gloucestershire

- Devised and prototyped a piece of data-logging hardware for the UK's leading fire and flood restoration business, DisasterCare. The hardware included a Bluetooth link between data-collecting hardware and data-logging hardware. The prototype was developed using C++ and an Arduino board.
- Constructed front-end web pages for an accounting web-app with HTML and CSS.

Checkers Gymnastics **02/2017 to 09/2019**
Gymnastics Coach

Checkers gymnastics is an acrobatics and tumbling gymnastics club in Gloucester, Gloucestershire

- Collaborated with other qualified coaches to give gymnastics sessions to groups of up to 50, aged from 4 to mid 50's.
- Led a team of junior coaches.

- Planned sessions and workshops in advance.
- Delegated responsibilities to junior coaches.

McDonalds **12/2017 to 10/2020**
Customer Assistant

- Served customers, including taking orders.
- Handled payments, taking over £10 000 in payments while at McDonalds.
- Adhered to strict food safety guidelines while preparing and delivering food.
- Managed stock levels based on frequency.
- Maintained high levels of cleanliness throughout restaurant.

MyTutor **01/2020 to present**
Maths and Computer Science Tutor

- Tutor for A-Level and GCSE Maths and Computer Science as well as Python Programming.
- Write lesson plans, involving planning in advance.
- Deliver one-to-one online lessons both privately and for schools.
- Enhanced DBS as part of the MyTutor Schools Program.

Serve Legal **09/2020 to present**
Auditor

Serve legal works to test and enforce restrictions on the sale of age-restricted products and services.

- Memorise and follow audit instructions exactly.
- Write detailed reports of staff actions and customer experience from memory.
- Plan routes and timings between multiple audits in a single day.
- Maintain high levels of organisation with notes, receipts and products.

EXTRA-CURRICULAR ACHIEVEMENTS

A full list of my extra-curricular projects can be seen https://btharding.github.io/. Some of the most educational and exciting experiences are listed below.

Weekly Game Jam **06/2020 to present**
Frequently take part in the weekly game jam hosted by Nekomatata games, used as an opportunity to try new ideas, and to take more risks than usual. Typically programmed in Java, every game is a learning experience regardless of level of success.

Lockdoneathon Hackathon **08/2020 to 09/2020**
Won first place in the “Protecting our Planet” prize for a web-app that calculated the carbon footprint of recipes, and a recipe’s vegan equivalent, to highlight the ecological impact of veganism. The front-end was built with React, with a back-end made up of the Spoonacular API for recipe searching, and a novel database of vegan substitutions and carbon footprints.

Veganalysis **08/2020 to present**
An ongoing project built off the web-app made for the Lockdoneathon hackathon. with improved searching, with refactored and more efficient code. Additional features added include deeplinking to allow recipe sharing

using React Routers. Currently developing an API to query the vegan substitutions and carbon footprint database.

SKILLS AND INTERESTS

Languages:	Native English and Beginner German
IT Skills:	Proficient in front-end web development languages (HTML, CSS, JavaScript with React) and Java. Comfortable in back-end web development languages (PHP, SQL, Django) and Python. Beginner C and Haskell.
Interests:	Former competitive gymnast, competing at very high national level.
